DEEL 1

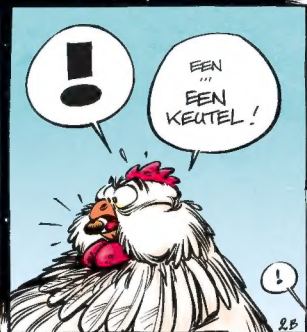

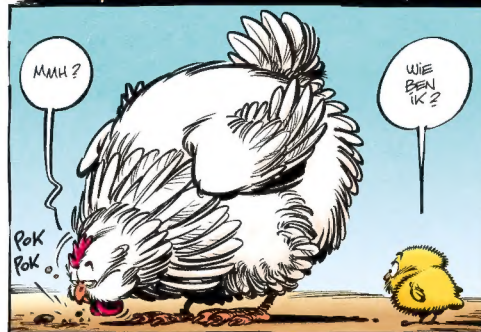

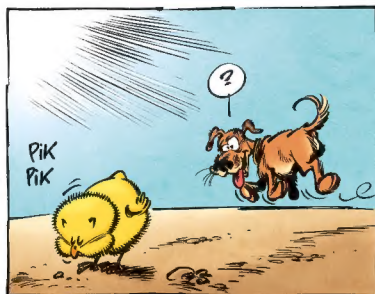

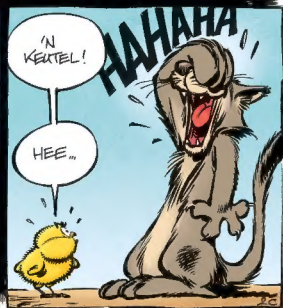

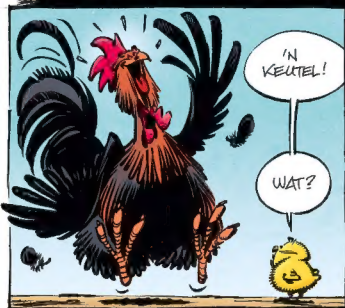

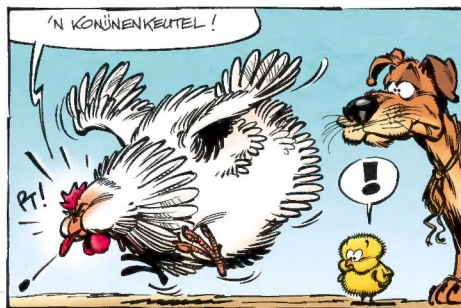

INKLEURING
STUDIO CERISE

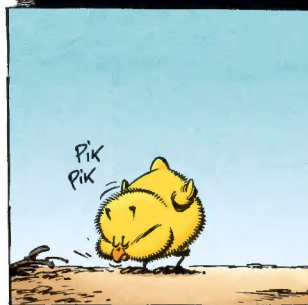

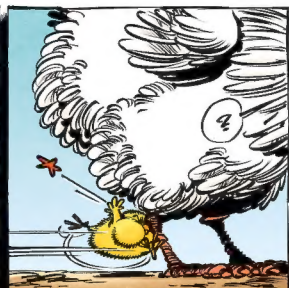

DUPUIS

OP DE OCHTEND VAN DE EERSTE DAG

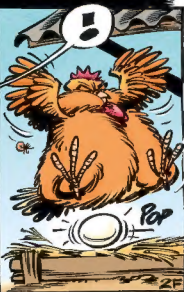

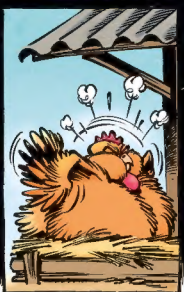

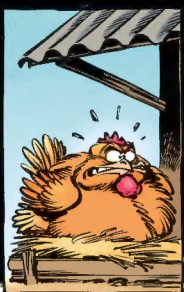

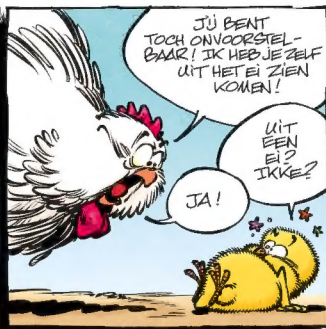

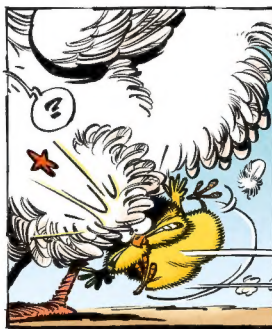

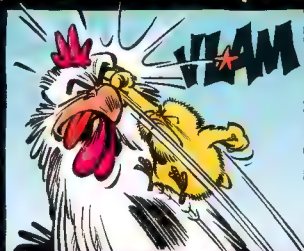

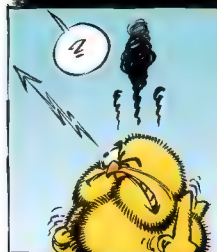

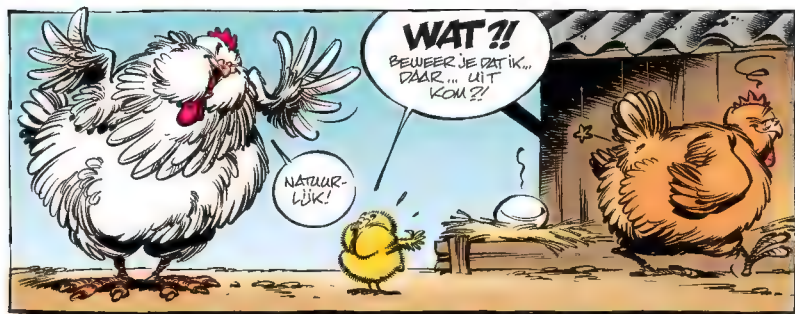

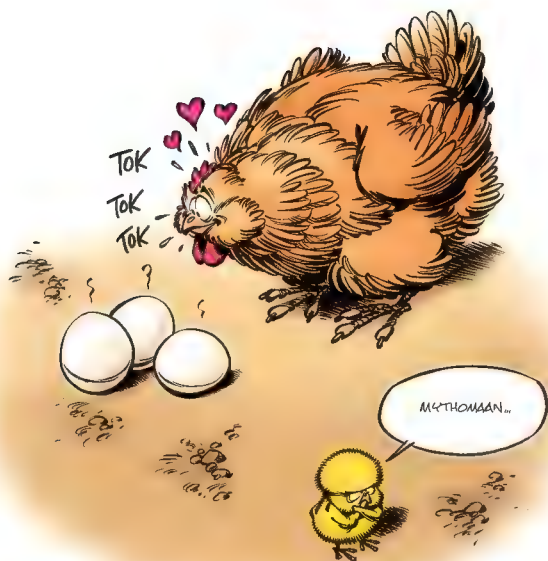

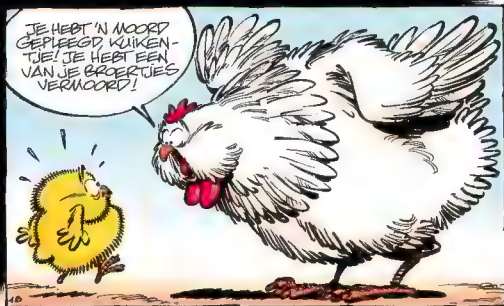

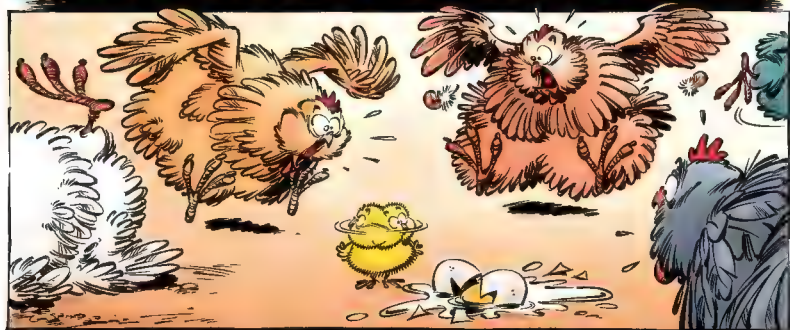

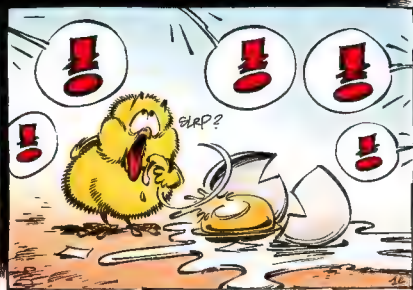

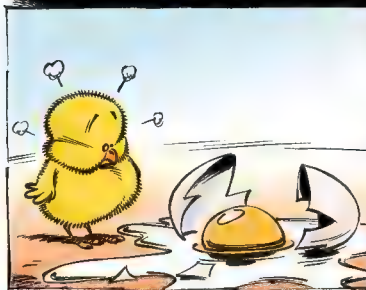

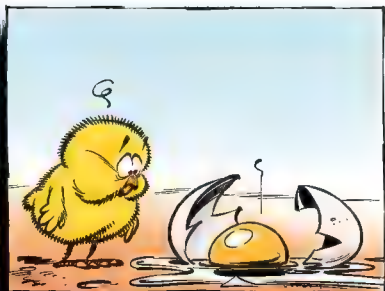

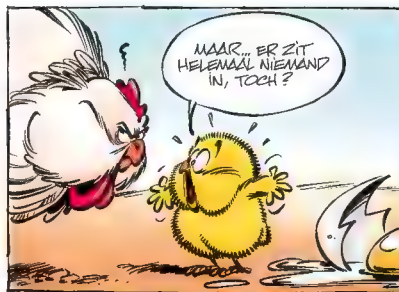

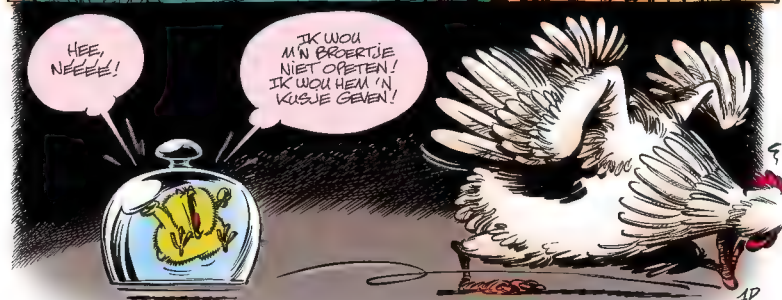

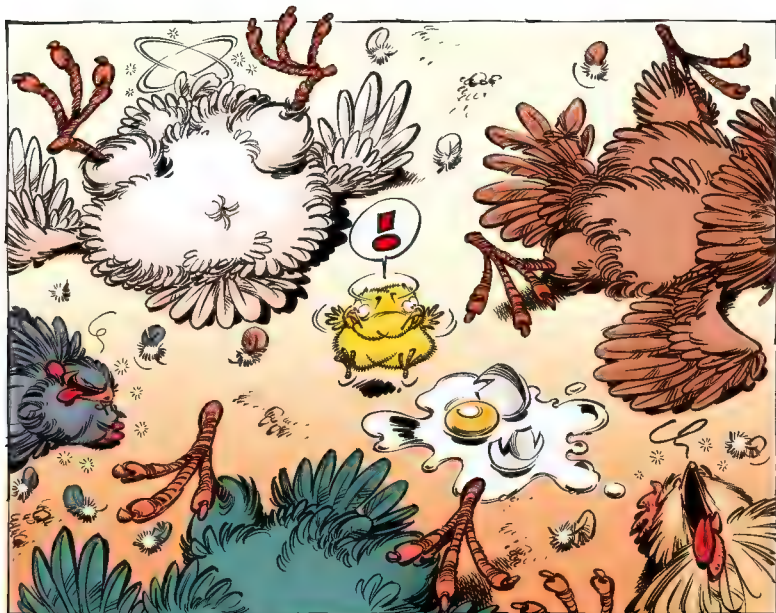

KAIN EN ABEL

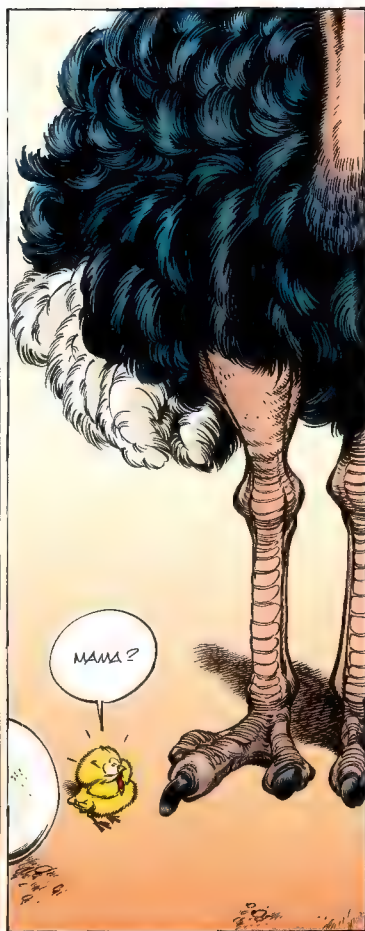

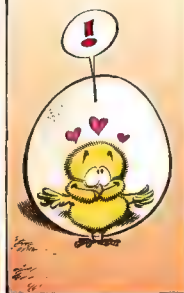

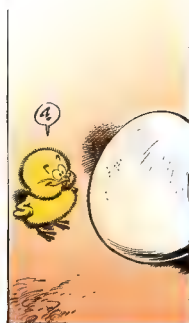

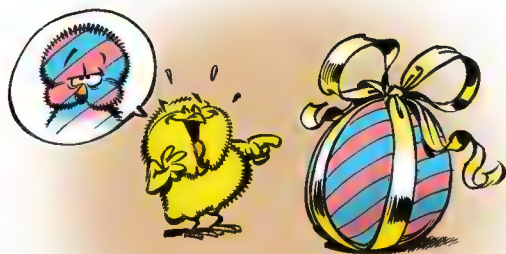

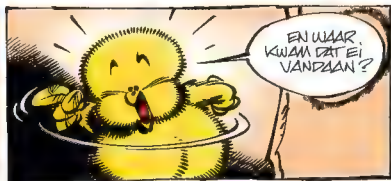

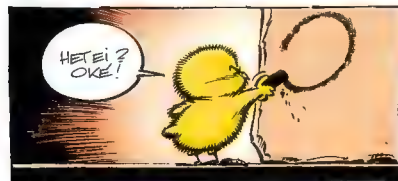

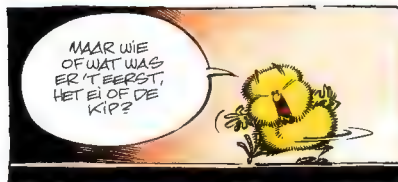

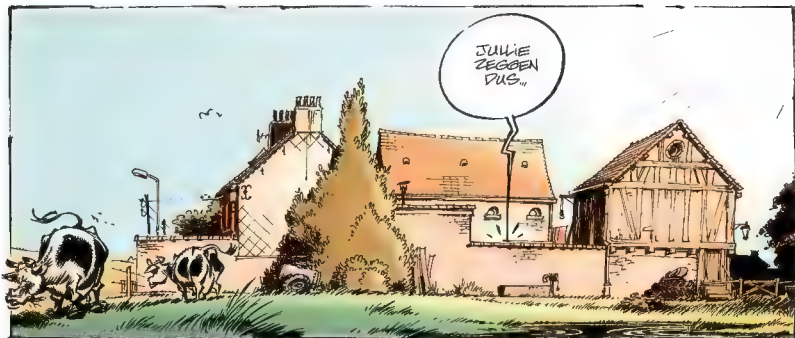

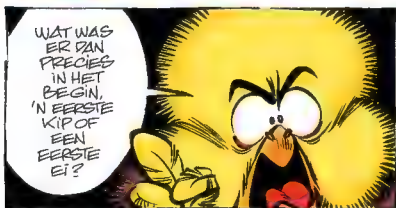

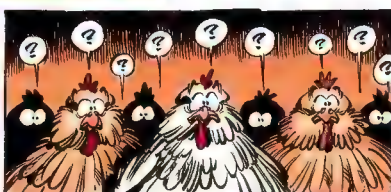

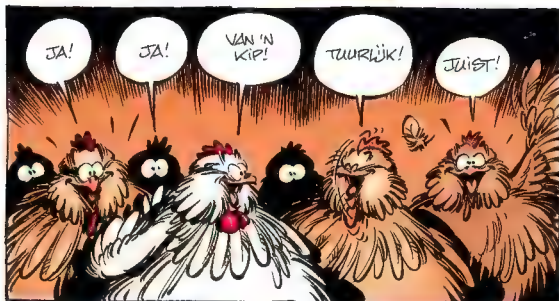

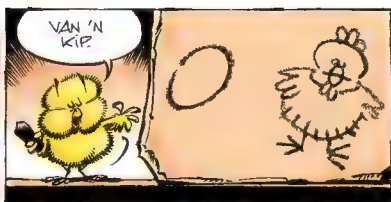

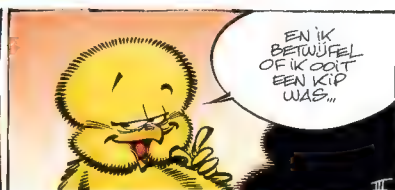

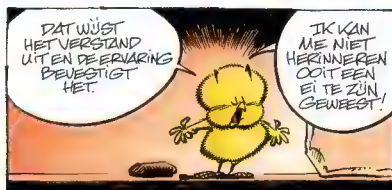

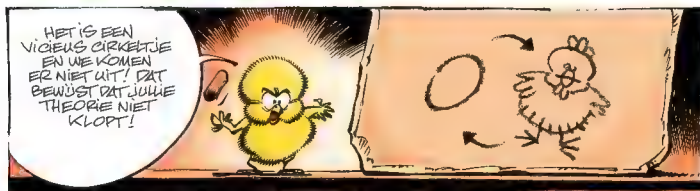

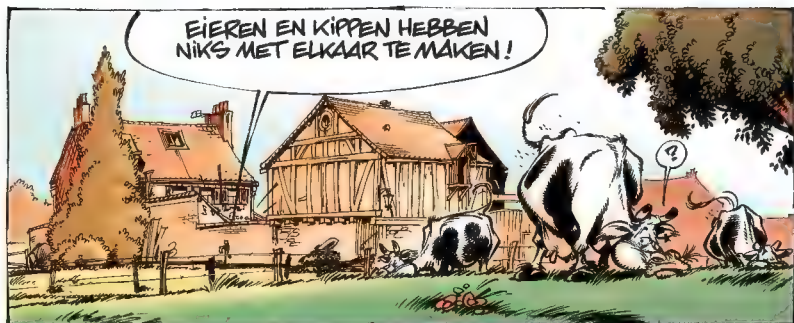

WIE OF WAT WAS ER HET EERST? DE KIP OF HET EI?

Enkele dagen later...

ZO IS HET INDERDAAD,
DIERENARTS...

DE KIPPEN
LEGGEN NIET MEER EN ZE
ETEN OOK NIET MEER. AL
EEN WEEK NIET.

DIT HEB IK NOG NOOIT
MEEGEMAAKT!

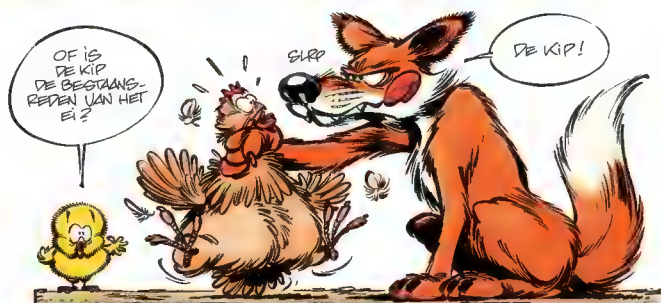

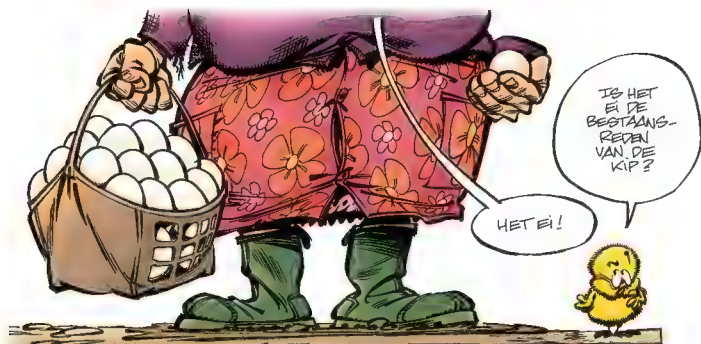

ALLEEN DAT KUIKEN IS NORMAAL.
HET EET ALLES VAN DE ANDERE
KIPPEN OP EN DIE LATEN MAAR
BEGAAAN.

DUS IS DAT KUIKEN DE LAATSTE HOOP
VAN UW KIPPENHOK.

IK DENK, DUS IK BEN

KOM
EVEN
BINNEN!

IK HEB HIER EEN
HELE BIBLIOTHEEK MET
BOEKEN OVER FILOSOFIE.

PLATO,
DESCARTES EN KANT
HEB IK AL ACHTER DE
KIEZEN. NU BEGIN IK
AAN HEGEL.

SUCCEES
ERMEE.

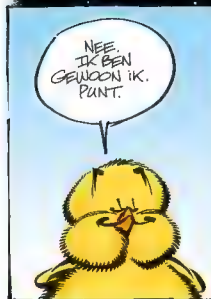

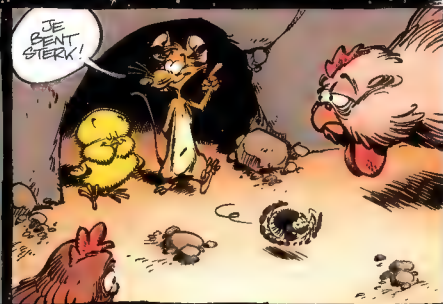

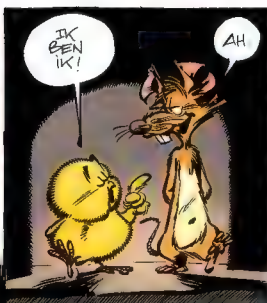

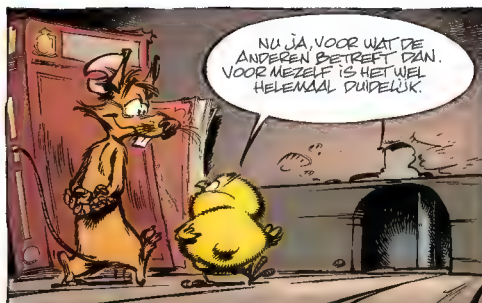

EN WIE BEN JIJ?

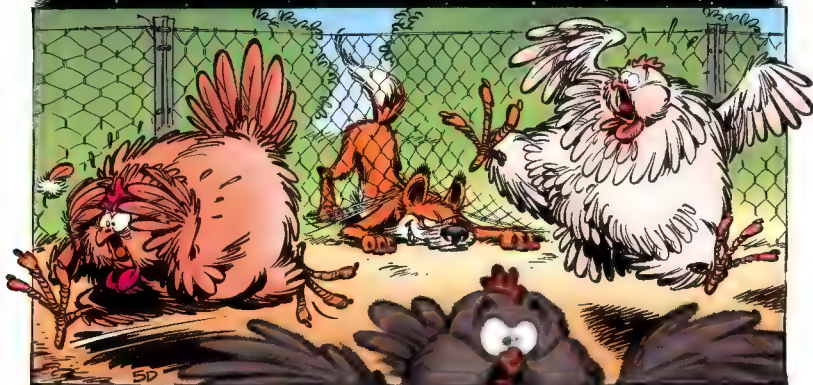

WEL,
DAAR ZIJN
WE NOG NIET
HELEMAAL
UIT.

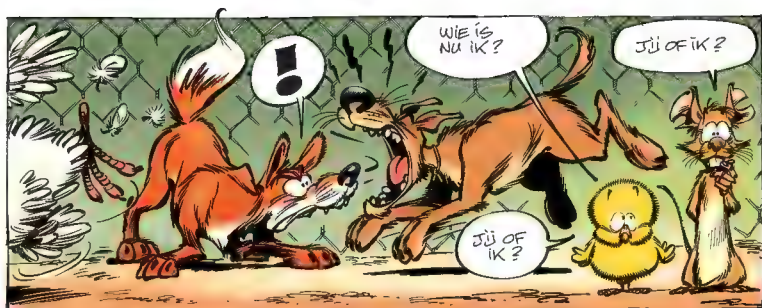

'N EEND, 'N KOIKEN,
'N BEER. MIJSCHEEN NOG
WEL WAT ANDERS...

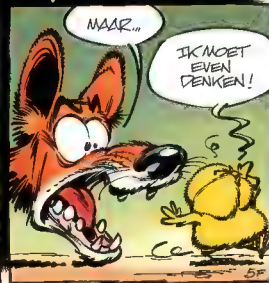

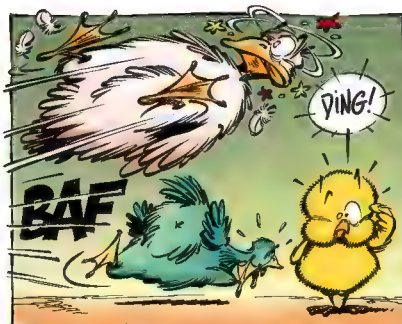

DE MENINGEN
VERSCHILLEN.

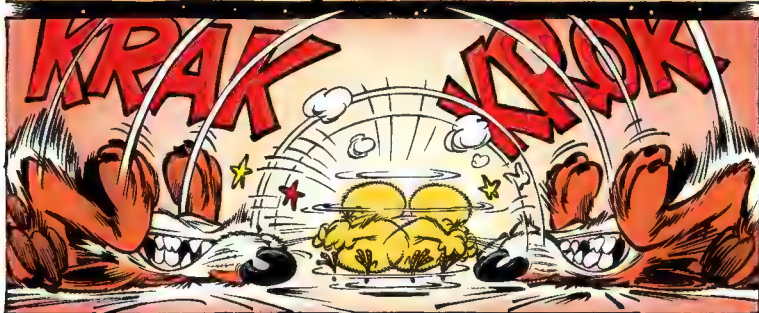

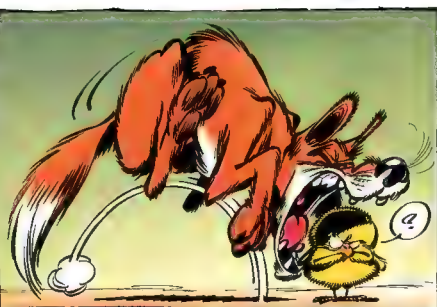

'T
BLIJFT 'N
OPEN
VRAAG

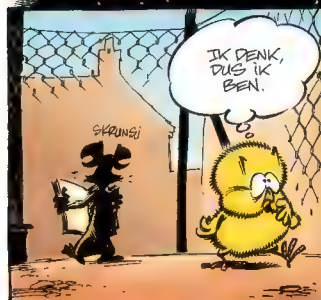

$$\begin{aligned}
 \Delta AMP \rightarrow \tan \alpha &= \frac{MP}{AP} = \frac{1}{AP} \Leftrightarrow AP = \frac{1}{\tan \alpha} \Rightarrow AB = 2AP + 1 = \frac{2}{\tan \alpha} + 1 \\
 \Delta MSQ \rightarrow \tan \alpha &= \frac{SQ}{1/2} = 2SQ \Leftrightarrow SQ = \frac{\tan \alpha}{2} \Rightarrow SH = SQ + 1 = \frac{\tan \alpha}{2} + 1 \\
 \Rightarrow S(\alpha) &= \frac{1}{2} AB \times SH = \frac{1}{2} \left(\frac{2}{\tan \alpha} + 1 \right) \left(\frac{\tan \alpha}{2} + 1 \right) \\
 \frac{dS(\alpha)}{d\alpha} &= 0 \Leftrightarrow \frac{1}{2} \left(\frac{-2}{\tan^2 \alpha \cdot \cos^2 \alpha} \right) \left(\frac{\tan \alpha}{2} + 1 \right) + \frac{1}{2} \left(\frac{2}{\tan \alpha} + 1 \right) \left(\frac{1}{2 \cos^2 \alpha} \right) = 0 \\
 \Leftrightarrow \frac{-2}{\tan^2 \alpha \cdot \cos^2 \alpha} + \frac{1}{2 \cos^2 \alpha} &= 0 \Leftrightarrow \tan^2 \alpha = 4 \Rightarrow \tan \alpha = \pm 2 \quad \frac{d^2 S(\alpha)}{d\alpha^2} \\
 \frac{d}{d\alpha} \left[\frac{1}{2} \left(\frac{-2}{\tan^2 \alpha \cdot \cos^2 \alpha} \right) \left(\frac{\tan \alpha}{2} + 1 \right) + \frac{1}{2} \left(\frac{2}{\tan \alpha} + 1 \right) \left(\frac{1}{2 \cos^2 \alpha} \right) \right] &= \frac{d}{d\alpha} \left[\frac{-1}{\sin^2 \alpha} + \frac{1}{4 \cos^2 \alpha} \right] \\
 &= \frac{2 \cos \alpha}{\sin^3 \alpha} + \frac{\sin \alpha}{2 \cos^3 \alpha}
 \end{aligned}$$
